E-mail for Office, Home, School, on the Road … Anywhere!

CE SOFTWARE

For Mac™ OS

Intuitive, Award-Winning Interface

Send and Receive E-mail From Anywhere, Anytime

Increased Speed for Maximum Performance

Ideal for Internet and Interoffice E-mail

Do you need a powerful, interactive communication tool for work and home? That tool is E-mail! No company knows E-mail better than CE Software, the makers of QuickMail™. For almost a decade, QuickMail has helped improve the communications of nearly 2.5 million people in offices and homes worldwide.

Now You Have a Choice

QuickMail Pro, with its award-winning interface, makes navigating through your electronic mailbox, as well as sending and receiving messages across the hall or around the world, a breeze. Why struggle with an E-mail application that makes life more complex? QuickMail Pro makes life simple.

Effortless E-mail

With QuickMail Pro, it's a snap to view incoming messages, create and send new messages, as well as file existing messages. You can sort your E-mail from a single, intuitive window. All this is facilitated with QuickMail Pro's drag and drop message handling. Staying on top of your electronic mailbox has never been so effortless.

Inside each package of QuickMail Pro, you'll receive everything you need to make your E-mail fast and powerful.

FEATURES:

Elegant Interface for Simple Mail Management

Effectively manage an ever-increasing number of incoming messages with QuickMail Pro's Inbox, Outbox, Sent Items folder, Trash folder and Personal folders—all from one window.

Client MailManager (Filtering)

Manage incoming messages automatically with QuickMail Pro's client-based MailManager™. The MailManager can read your E-mail for you and Reply, Forward, File, Print, even Delete any message based on criteria you set.

Stylized Text

For added emphasis, change the font, color, size and style of text in any QuickMail Pro message. Stylized text is compatible with Netscape Navigator™, Microsoft® Internet Mail, Microsoft Outlook, Eudora Pro™ and other MIME E-mail clients.

Message Peek

Only open messages that interest you by sneaking a peek at the first few lines of content from the main window before opening.

Mail Ticker

View the subjects and senders of E-mail messages in your Inbox at a glance without opening QuickMail Pro.

Address Books and Directory Services

Addressing a message is as easy as selecting one or more recipients from an address book. Find E-mail addresses fast with QuickMail Pro's Finger, Ph and LDAP capabilities.

Background Mail Processing

For increased speed, QuickMail Pro sends and receives messages in the background (whether or not the application is active) without interrupting your work.

A Variety of E-mail Forms

QuickMail Pro includes more than a dozen E-mail forms for sending detailed messages to other QuickMail users. Forms can optimize workflow or add flair to messages. The included QM Forms™ application allows you to create your own!

World Wide Web Integration

Send messages from Netscape Navigator® or Microsoft Internet Explorer using QuickMail Pro. Just click any E-mail address displayed on a Web site and a QuickMail Pro pre-addressed message form pops up. Type your message and send.

QuickMail Pro

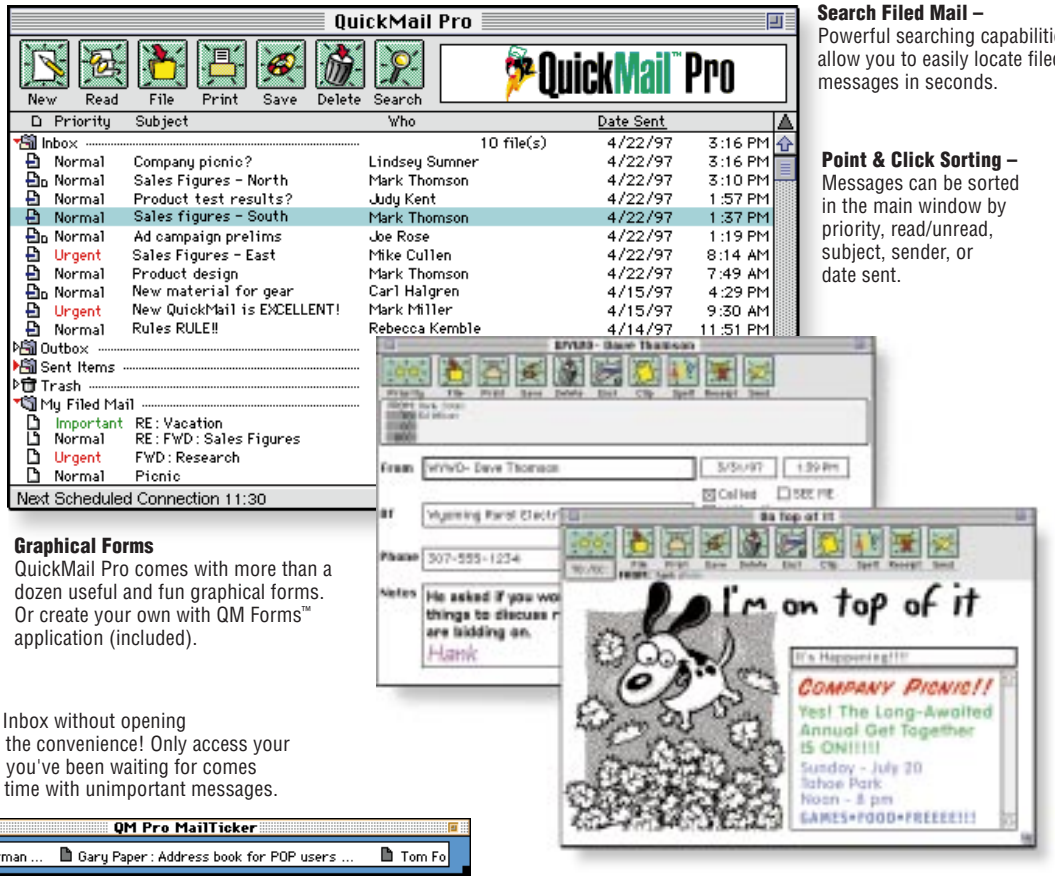
For Mac™OS

Notification of New E-mail – Notifies users with a flashing icon and/or sound when new messages arrive.

Drag & Drop – Enclosures and filing.

Prioritize Messages – With five levels of priority, ranging from "Bulk" to "Urgent," you can assign priorities to the E-mail you send.

Personal Folders – Allows you to create personal folders that reside in the main window. You can file hundreds of messages in each folder.

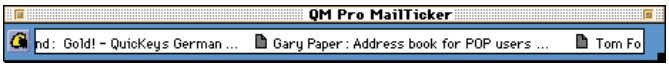


Search Filed Mail – Powerful searching capabilities allow you to easily locate filed messages in seconds.

Point & Click Sorting – Messages can be sorted in the main window by priority, read/unread, subject, sender, or date sent.

Graphical Forms
QuickMail Pro comes with more than a dozen useful and fun graphical forms. Or create your own with QM Forms™ application (included).

MailTicker
View messages in your Inbox without opening QuickMail Pro. Think of the convenience! Only access your E-mail when something you've been waiting for comes through … don't waste time with unimportant messages.



Send and Receive Attachments

QuickMail Pro auto-encodes attachments to match each recipient's computer—Windows, Mac OS and UNIX.

QuickMail Pro Menu

Access many of the functions of QuickMail Pro through a single menu bar item. Open or close QuickMail Pro, check or send mail and more.

Built-In Spell Checker

Eliminate errors with QuickMail Pro's built-in spell checker.

Other Features Include

- Auto install address books and groups
- Single click to launch URLs from an E-mail message
- MIME Support
- Standardized automatic formatting (quoting, attribution and signature insertion)
- Customizable banner
- Dial-up network support
- Leave messages on the server
- Native language versions for Japanese, German, French and others

MINIMUM REQUIREMENTS:

A Post Office Protocol, version 3 (POP3) network E-mail account or an E-mail account with an Internet Service Provider (ISP), Mac TCP or Open Transport, PPP, SLIP for dial-up users.

Accelerated for Power Macintosh

QuickMail Pro for Mac OS:
