

Getting Started

Getting Started With MiniCalendar

The MiniCalendar 2.0 *f* folder contains the following items:

ere are descriptions of what you will find:

MiniCalendar 2.0 FAT

The MiniCalendar application is the actual program itself. Double-clicking on this icon launches MiniCalendar. You may wish to automatically launch MiniCalendar at startup by placing an alias to MiniCalendar in the "Startup Items" folder.

Personalize MiniCalendar

Use this Personalize MiniCalendar application to finish the registration process by entering your name and license code. This program should not be thrown out or moved from your system. Even after you register and enter your code, you may need to enter your code again if you get a new computer or hard drive.

Register

Use this program to create a billing invoice to send to Kagi.

MiniCalendar ReadMe

This is the icon for the MiniCalendar ReadMe you are currently viewing. Hold on to this documentation for future reference.

If you are missing any of these items, the best thing to do is to download the MiniCalendar archive again. If you have any problems, contact Catara™ Software's technical support. We will be happy to help.
