The Master

ClockSync Servants access the ClockSync Master to determine the current date and time.

he Master must be running at all times so that it will be accessible by Servants across the network.

Changing The Master Name

If you have a large network with computers in multiple time zones, you might want to change the name of the Master to something more informative than the default name.   By clicking on the "Choose new Master name..." button the following dialog will appear:

ote that if you do change the name, the new name won't take effect until you restart the ClockSync Master.

Registering The Master

ClockSync is shareware.   An unregistered copy supports up to five licenses, and will begin displaying a reminder dialog after 15 days.   You can eliminate the reminder dialog and increase the number of licenses by registering the program.   Once you receive your registration password, you can type it in the dialog below:
