Flexible and powerful post processing -

sonicWORX Studio is a powerful tool designed for post processing complete songs and audio recordings in the digital domain. Besides a professional wave editor including all the functionality you expect from an up-to-date audio editing tool featuring advanced functions like multiple Undo/Redo, a graphic multi branch edit history for easy viewing, auditioning and restoring all edit steps and a snapshot function for easy storing and retrieving of processed versions, sonicWORX Studio also offers advanced DSP capabilities allowing for a vast amount of different analysis and processing features some of which even run in realtime without the need of a single chip of additional hardware.
