Introduction

TiCalendar is a small calendar program with notes by day. A one trick pony, but small and cute!

Limitations

Well, none, really. It does only one thing, but hopefully well.

Changes since 1.0.2:

Added notification of information (any day with info has a green dot), and printing (current month prints).

Changes since 1.0.1:

Annoying cosmetic bug fixes (changing days cause text to be momentarily shown at top left of window). Now only saves files with actual information in them (not just every day clicked). Forward and backward year buttons added. More consistant buttons (buttons match under almost all circumstances).

Changes since 1.0:

There was a scrolling bug, plus the notes window did not autoscroll. The bug is fixed, and it now does autoscroll.

Features

- Balloon Help
- Both a PPC and 68K version included (for small file size)

Installation

Drop the archive on StuffIt Expander and stand back!

Menu Reference

🍏 Menu :

About TiCalendar... Tells who made the program, etc.

File Menu:

Print... Print the current month's notes.

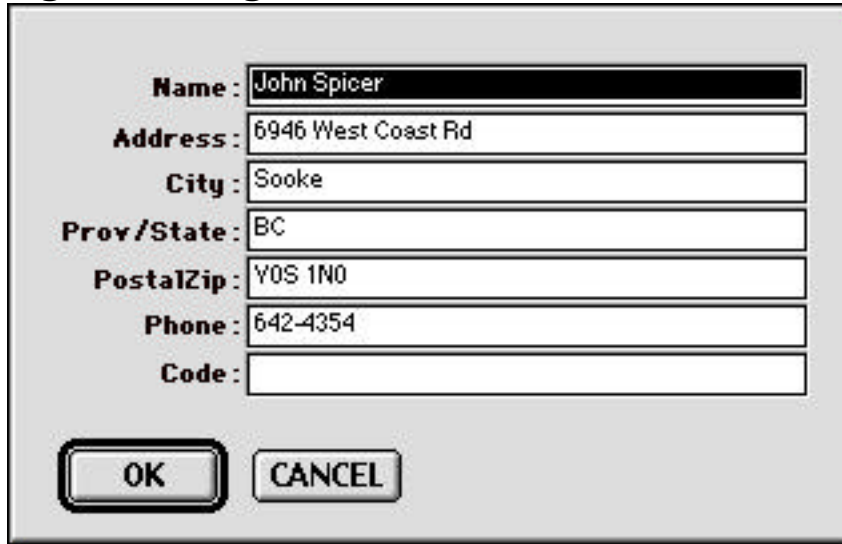

Quit Quit the program

Edit Menu: The Edit menu has limited support. Used only for entry/editing of text.

Preferences... For entering the user's registration code, name,

address. **NOTE:** After entering your registration code, you **MUST** exit and re-enter the program for it to take effect.

Figure 1.1 Registration

A registration form dialog box with a light gray background and a black border. It contains several text input fields with labels to their left. The fields are: 'Name' with 'John Spicer', 'Address' with '6946 West Coast Rd', 'City' with 'Sooke', 'Prov/State' with 'BC', 'PostalZip' with 'V0S 1N0', 'Phone' with '642-4354', and 'Code' which is empty. At the bottom left are two buttons: 'OK' and 'CANCEL'.

Name :	John Spicer
Address :	6946 West Coast Rd
City :	Sooke
Prov/State :	BC
PostalZip :	V0S 1N0
Phone :	642-4354
Code :	

OK CANCEL

UPDATES

Updates are always free. Your code will always work on future versions of the program. Please register, it means the program will continue to be supported and updated.

NOTE: The about box is live. Clicking on a hotspot will run Netscape (if available) and either take you to the specified web site, or e-mail.
