

Chapter 6; Paying For MailFetch:

MailFetch costs only \$15.00. MailFetch is shareware, which means you are welcome to install it and try it out before paying for it. Once you decide you want to keep MailFetch, you must pay the \$15.00 shareware fee. If you want to pay for more than one user at a time, the pricing is as follows:

1-5 users, \$15 per user

6+ users, \$10 per user

A Site License costs \$300 and covers all locations for your organization within a 100 mile radius of your site. One big advantage of a Site License is that you do not need to keep track of how many people at your site are using the software.

A World-Wide License costs \$1000 and it covers all locations for your organization.

Paying for MailFetch is easy. Payments for Iron Software products are handled by a company called Kagi, and they can accept payment in several ways. You can pay by credit card, check or cash, and if paying by credit card you can send the information to Kagi via the Web, or by e-mail, fax or postal mail. Check and cash payments must be sent by postal mail, of course. When your payment has been processed you will receive a registration code that will turn off MailFetch's "Please Register" reminders.

To pay with a credit card via the Web, go to the Iron Software Web site at this URL: <<http://www.ironsoftware.com>>. Then click on the link for "Online Payment". This takes you to a secure Web page where you enter your credit card information and indicate which of the Iron Software programs you are purchasing. Online orders are usually processed within 1-3 days.

If ordering by e-mail, fax or postal mail, open the "Register MailFetch" program that accompanies MailFetch. You can do this either by double-clicking the "Register MailFetch" icon from the Finder, or by clicking the "Fill Out Order Form" button in the "Please Register" dialog that MailFetch displays. Enter your name, your e-mail address or postal address, and the number of user licenses you desire. Save or Print or Copy the data from the Register MailFetch program and send the data and payment to Kagi.

Payments sent via e-mail or the Web are processed within 1 to 3 days. You will receive an acknowledgement from Kagi and your registration code from Karl Bunker, both via e-mail. Payments sent via fax take up to 10 days. If you provide an Internet e-mail address you will receive your acknowledgement and registration code via e-mail. Please note that you must provide Kagi with your full Internet e-mail address, with the "@aol.com" suffix, not just your AOL screen name.

If you are paying with Cash or USD Check you should print the data using the Register MailFetch application and send it to the address shown on the form, which is:

Kagi
1442-A Walnut Street #392-C2
Berkeley, California 94709-1405
USA

If you pay via check, it must be a check drawn in U.S. Dollars. Kagi cannot accept checks in other currencies. Payments sent via postal mail take time to reach Kagi and then up to 10 days for processing. Again, if you include a correct e-mail address, you will receive your acknowledgement and registration code via e-mail.

If you have a purchasing department, you can enter all the data into the Register program and then select Invoice as your payment method. Print three copies of the form and send it to your accounts payable people. You might want to highlight the line that mentions that they must include a copy of the form with their payment. Kagi cannot invoice your company, so you need to act on my behalf and generate the invoice and handle all the paperwork on your end.

If you do not wish to use your e-mail address, please enter your complete postal address; we will need it

to send you your registration code for MailFetch in the mail.
