

Problems/Solutions

- Problem: It doesn't seem to work!
- Solution: Perhaps KeySwapper has been turned off. Make sure the switch in the lower left of the window is in the on position.
- Problem: It causes problems with a certain application.
- Solution: From the preferences dialog box you can create a list of applications that cause problems while using KeySwapper. You can add the application to a list of special applications (see Customizing KeySwapper above).
- Problem: Some command keys no longer work with a certain application.
- Solution: Make sure you have not set up any "Hotkeys" using the same key(s) used by an application.
