

# Purchase Information

MindControl is available through our online store. If you'd like to try before you buy, you can use the demonstration version, which is fully functional for seven days (after seven days the software will be functional for one hour after each system restart).

There are two ways to purchase MindControl:

- 1 Open the MindControl application and select "Buy MindControl" (Command+B) from the Special menu. This will establish an Internet connection and guide you through an online purchase.

- 2 Buy MindControl directly from MindVision's online store at <http://www.mindvision.com/mindcontrol>.

Whichever method you choose, purchasing online is fast and easy, and you can rest assured that any information you provide will remain secure.
