Other Lazy Mountain Software titles you may like...

Hostal
Allows local IP address mapping by creating a Hosts file for your computer. Also allows content filtering by blocking designated hosts. Available for Mac OS or Windows 95/98.

Trash Sack
Trash Sack is a small application package that provides undelete capabilities similar to some larger and much more expensive utility suites. It may just save your day.

IP Catcher
If you have a dynamic IP dialup account, you need IP Catcher. Instantly alert friends to your current IP address. Control the IP address you are assigned.

ClipDoubler
Copy and Paste to your hearts content! ClipDoubler adds easy flexibility to your Mac OS Clipboard. Create as many clipboards as you need to get your work done.

Key Pad

A central location for internet passwords, bank accounts, license numbers, and other important data. Fast and compact, it is perfectly suited for use as an Apple Menu item.

"I believe most users will find Key Pad a useful tool for organizing a variety of scattered information." - Jerry Eidem, MacChamp, June 1999.

4 Cows from Tucows Network.

Lestrade - Use Sherlock plugins! Now available for Windows!
Find Anything Anywhere on the Internet. The successor to LazySearch. A fast and flexible plugin architecture lets you customize Lestrade to suit your individual needs. Fast and compact, you can configure it to work with virtually any search engine you wish.

Lestrade is a ChezMark MacPick!
TUCOWS rates Lestrade 5 cows!
FileMine thinks Lestrade is a jewel!

MacEMT
Look for trouble before it happens. Use your favorite repair utility to automatically scan disks for damage anytime you have a crash. A handy diagnostic tool.

TUCOWS rates MacEMT 4 cows!

iConnect
iConnect is a small application designed to provide automatic control of your internet dialup connection. It senses when you launch an internet application and can automatically connect for you.   It senses when you quit your internet applications and can automatically disconnect for you. It is highly configurable and can be easily adapted to suit your internet habits.

My Workspace
A different kind of application launcher. Resume working on everything you had open with just a click of the mouse. Just double click to save your current worksession. Double click again to restore your work session. Create worksessions for a variety of tasks.

Quite simple...very useful says MacCentral.
TUCOWS rates My Workspace 4 cows!
