

• Version 2.51 / February 19, 1995 •

CD Tracker Pro® is a FileMaker Pro® 2.1 database for keeping track of your CD collection. CD Tracker Pro® features a slick graphical interface (designed by a graphic artist/designer) that makes 'tracking' your CDs an efficient and effective Process. The Bottom Line: It is the ULTIMATE tool to keep track of your expanding compact disc collection.

*** CD Tracker Pro® requires a color monitor 13" or larger! ***
*** CD Tracker Pro® requires FileMaker Pro 2.1 or later! ***

Features Include:

- + Track your CDs by artist/album title/song/label/etc...
- + IMPORT and EXPORT records from/into other databases, etc...
- + Record sound bytes or "thumbnails" of your favorite song for each CD
- + Printing capabilities
- + Network friendly
- + Keep track of lyrics to your CDs
- + Sort/Search
- + CD Reporter (gives valuable info on your collection)
- + ...and much much more

=== CD Tracker Pro makes it EASY to upgrade from previous versions of CD Tracker pro, OR even from other products.

** To upgrade from an EARLIER version of CD Tracker Pro, just click on the "IMPORT" button in the CD Editor layout and select the earlier version of CD Tracker Pro (or the older CD Tracker, too) in the dialog box. Next match up the fields from the old with the new and click the "OK" button. That's all! All your compact discs that were stored in the older version are NOW in the new version! You may now delete the old version to save space on your hard drive. The same can be done to upgrade from other products or text files you may already have created.

You may freely distribute CD Tracker Pro, just make sure it's in it's original form and has this ReadMe with it. The author makes no warranties, either express or implied, regarding CD Tracker Pro. Use of CD Tracker Pro is at your own risk. The author claims no liability for data loss or other problems caused directly or indirectly by CD Tracker Pro.

CD Tracker Pro® is shareware. If you use it for more than 30 days, you must

register it. Please send \$15* to:

Jason Fried
2316 East Fifth Street
Tucson, AZ 85719 USA

email: fried@GAS.UUG.Arizona.Edu (please email me if you would like to comment, suggest, and/or, ummm, criticize).

* the \$15 registers you and entitles you to the password, internet email updates/info, and "technical support" (like you'll need any...). If you want to be mailed the latest version of CD Tracker Pro®, please enclose an additional \$7 for S/H and the disk. If you would like CD Tracker Pro® mailed over seas, please include an additional \$3 (for a total of \$25).

Version History

v0.50 (Late September/Early October, 1994)

- first public beta
 - lacked printing
 - lacked CD reporter functions
 - calculations didn't work

v0.90 (Early/Mid October, 1994)

- second public beta
 - major overhaul of GUI
 - added the CD reporter functions and corrected miscalculations
 - added password Protection
 - added catalog# field (user request)
 - other major/minor fixes

v1.00 (October 18, 1994)

- first public RELEASE
 - fixed Problems with the CD reporter functions
 - added printing capabilities
 - fixed some minor cosmetic Problems (user request)

v1.40 (October 22, 1994)

- second public RELEASE
 - added list view option to the CD editor (user request)
 - fixed modification Problems
 - changed password
 - overall major improvements in speed, design, printing, and display

v1.45 (October 24, 1994)

- major speed increase when browsing
- streamlined and improved printing Process (user request)
- added modified date/time fields (user request)
- added IMPORT function (user request)
- fixed various cosmetic Problems, etc
- ...other things here and there

v2.0 (Now called CD Tracker Pro®) (November 01, 1994)

- introduced CD Tracker Pro®
 - MAJOR feature additions
 - **added sound capabilities (record songs/sound bytes)**
 - added lyrics file/database (allows the storage of lyrics)
 - hot-linked CD Tracker Pro® 2.0 with the lyrics database (**just**

click on a song's number and you can view/edit it's lyrics -
use the Spin Doctors, Pocket Full of Kryptonite, songs 1/2/3/7
as examples

- improved the constancy of the graphical user interface throughout
- you can now click on the "CD Number" text to go to a specific CD
- added a rating field (1-5 stars)
- the CD Editor now fits on one page (user request)
- moved the comments field to a seperate layout (more space)
- added "recording type" totals to the CD Reporter
- new logo!
- ...and much more

v2.1 (November 15, 1994)

- changed printing architecture (Now to print: Select the printing layout desired from the main menu printing pop-up-menu field, and then just click on either the word "PRINT" or the little printer icon)
- added a shareware registration form generator in the "ABOUT" layout (user request)
- added "musicians/instruments," "recording date," and "producer(s)" fields to the comments/notes layout (click on the comments/notes button at the lower right hand side of the CD Editor) (user request)
- fixed some bugs here and there
- upped the ante to \$15 - this will provide for better support in the long run - BELIEVE ME.

v2.2 (December 07, 1994)

** This version is the culmination of MANY user requests since version 2.0. They would have been in eariler, but some of them required extensive time and ingenuity. Anyhow, they're all there!

- changed the main menu around a bit
- clicking on a specific heading in "List View" will sort by that specific heading (user request)
- added a "random" button - clicking on this will randomly choose a CD and display its entry. This is useful for radio stations (user request) [NOTE: Not functional in this version -I tried!!!]
- added a "format" field - make note if the CD is one CD, two CDs, a CD Single, or other (user request)
- added the ability to add additional tracks if a CD contains more than 19 tracks (user request)
- added a new "detailed info" layout (accessible from the CD Editor). this new layout will allow you to enter very detailed info about a specific CD (musicians, instruments, composers, etc...) (user request)
- changed the printing architecture (again!). A little easier to understand now - just select the print layout from the pop-up menu at the main menu and then click on the PRINT icon.
- added the option to preview a print layout before you print it. To return to browse mode, if you choose NOT to print, just select "Enter Browse Mode" from the script menu.
- added a new print layout (Artist/Title/Label/Catalog #) (user request)
- and a few fixes here and there...

v2.51 (February 19, 1995)

- fixed the problem where additional tracks/times were NOT added to main CD Editor screen (Thanks to all who brought this to my attention)
- made the catalog # field a "unique" value field - this will prevent duplicate CDs from being entered (user request)
- centered the time field for additional songs (user request)
- added a pre-defined list for the "Type of Music" field (user request)

- added the option to search by "Type of Music" (user request)
- some MAJOR graphical changes
- new printing architecture - it's easier to understand now
- removed the random button (never worked)
- new icon!
- fixed screen location bug
- fixed lyrics database link/return problem
- and a few other things here and there

COMING SOON & KNOWN BUGS

- The ability to track compilations
- When searching for a track, the tracks listed in additional tracks are not searched... Fix coming REAL soon.

NOTE: As you may have noticed, CD Tracker® Pro® improves VERY fast. This should demonstrate my commitment to this Product. You can be sure it will be supported!

NOTE2: I have also noted, in parenthesis, wherever I have incorporated a user's suggestion into this Product. Keep 'em coming!
