Ten Best for Ten Dollars

Our original idea was to pick our ten best shareware and public domain programs in each category, compact them in self-extracting files and sell them for a ten dollar handling and processing fee on a high density disk. This would enable us to bring you the best of our material on one HD (1400k) disk rather than the three DS (800k) disks it would usually take. As it worked out, in some cases such as the Creative Writing and Games disks, we were able to fit far more than ten programs on the disk and in other cases, we had to leave out some of our favorite programs. We've also included brief, generic instructions for using these programs and finding and using help when its available as well as for extracting compacted files in case you've never encountered them and more good programs. These instructions are included on the disk if there's enough room or are included in a hard copy if there's not.

The result is one of the best and most inexpensive deals available anywhere. Check out the ordering information at the end of this article.

1 - Art

PictureViewer, Artisto+, Viewer, Block Paint, Color Time, Fractals, Funny Faces Construction Kit, Kidpaint™, LightningPaint 1.1, Pattern Blocks, Robin's Paint Box, ShapeArt 1.0, Spiromac, SplatMaster, Super Ruler, Tecno-Doodle
