

*This application is based on the amazingly wonderful  
System Errors DA version 3.0, which was created using  
Bill Steinberg's Display DA 2.0.*

*With System 7, the new errors list exceeded the  
32k limit on text files.list. We're all indebted  
to Mark Wall at Green Mountain Software for  
creating DOCMaker™ (such a cool app!)*

*I apologize if you find any factual errors  
in this application. I am a complete novice at  
programming and C, and created this for my own  
use in an America Online C Class.*
