New MacPaint Icon Installation

1. Open New MacPaint Icon with ResEdit. Scroll till you find ICN#.
2. Copy ICN# to the clipboard by selecting ICN# and choosing COPY from the EDIT menu.
3. Open (a copy) of your MacPaint application with ResEdit. Scroll till you find ICN#. Select ICN# and then choose PASTE from the EDIT menu.
4. That's about it...depending on the circumstances, you may have to rebuild the desktop on the MacPaint disk by ejecting it...holding down the OPTION & COMMAND keys...then re-inserting the disk, in order for the new icon to 'take command'.

Enjoy...
