

## **Second Sight™**

Those systems using Second Sight for their BBS of choice will drag the Menus from the CD Setup folder to their hard drive. Next use MenuEdit to change the paths that contain "LoDOWN-20A" as the primary hard drive to that of your particular BBS menu path. Do NOT change those paths that show "AMUG CD:Files:" unless you want to move these large directories to your hard drive. These paths lead to the CD directories and are necessary to find the particular Second Sight directory. You can also customize these menus any way you like or leave them intact with the new paths for your users.

This simple installation process should be very easy and take a minimum of time. However if you need help you can reach our Tech Support number at (602) 553-8966 weekdays and other times as available.

If you are interested in having your menus on the next CD send them to MacWizards at 718 E. Campbell Ave., Gilbert, AZ 85234.

If you do not currently own Second Sight you can purchase it from:  
The FreeSoft Company / Scott Watson  
150 Hickory Drive  
Beaver Falls, PA15010  
(412) 846-2700

Fidonet / Tabby interface tools for Telefinder can be purchased for \$80.00 from:  
M. E. Connick & Company  
P.O. Box 307  
Bradley Beach, New Jersey 07720  
(201) 988-0659

Several fine Second Sight / Tabby tools including FF, Areatrix, Mehitabel, Archie and more are available in the Pete Johnson folder in the Tele section.
