

ZipScript:

This is a font package that produces bar codes used by the post office. Only the numbers, the grave (`) and the tilde (~) produce characters. The numbers generate the proper bar code for that digit, the grave (`) produces a tall bar and the tilde (~) a short bar.

Usage:

The bit-map of the font should be loaded into the system file. The PS portion of the font should be placed in the system folder for automatic downloading. Use as you would any other font. When printing zip codes remember to add a tall bar (`) to the beginning and end of the zip.

Limited Warranty and Disclaimer:

This font package is provided "as is" without warranty of any kind, either express or implied, including, but not limited to, the implied warranties of fitness for a particular purpose.

Copyright:

This font package is Copyright© 1989 The Avanti Group.

you may:

- a) Post font package on any private or public Commercial OR non-Commercial bulletin board or service, **provided**, this notice accompanies the software, and The Avanti Group is identified as the author of the work.
- b) Use this font **provided** you pay the **\$1.38** license fee **per printer** it is being used on. From this fee you may deduct 13¢ for the cost of your check and 25¢ postage (if you like this send a dollar).

you may NOT:

- a) Modify, translate, reverse engineer, decompile, or disassemble.
- b) Resell, rent OR provide to third parties without the prior written consent of The Avanti Group
- c) Remove or modify any of the identifying copyright notices, labels or marks.

Payment:

Please send payment and/or any comments to:

The Avanti Group
4804 Kingston Drive
Annandale, Va 22003-6147

Update:

For all you 4Ders out there, the equal (=) and Plus (+) signs now generate tall and short bars respectively.
