

FirstClick! 1.0B.2

from Millennium Software Company
Written by Kevin Gregory

OVERVIEW

FirstClick! was created in response to user requests. By opening *FirstClick!* and selecting *any* application, you can modify it to process the First Click that occurs in the window. This is similar to clicks found in Microsoft Windows as well as many current Mac applications.

FirstClick!, while running more than one application (including one application and the system software), will allow the background application to process the First Click that occurs (this is the one that usually brings the application to the front) in the application's window.

NOTE: This is a beta version so please report *any* bugs to the address below. Thanks!

How To Use FirstClick!

FirstClick! is a very simple product that allows users who might be uncomfortable using ResEdit to change applications so they can process the First Click in their windows. *FirstClick!* also performs this action much more quickly and easily, even for ResEdit experts.

To use *FirstClick!*, you simply launch the *FirstClick!* program and a splash screen will appear for a short period of time. This will be followed by a standard file-opening dialog box. This box will show only applications. Simply navigate through this box as you would normally do and OPEN the application you wish to modify to accept the First Clicks. The program will perform the modification (this may trigger some virus software programs), and then display the dialog box again. When you are through modifying your applications, simply select CANCEL in the dialog box.

Once this is done, your application will now accept the First Clicks. You can perform the *FirstClick!* modification on as many applications as you like.

Don't Forget to Send in the ShareWare Fee!

FirstClick! is a simple product and following Millennium Software's views, is charged accordingly. Although we request only a modest \$5 shareware fee, it is this very fee that allows us to write programs as shareware and not attempt commercial distribution which would place undue costs onto both you and us. If you use *FirstClick!* and like it, please send in the \$5 fee. You will be eligible for free upgrades as well. Thank you in advance for your honesty. Please mail your payment to the following address:

Millennium Software Company
