

**The Totally Incomplete List of Newton Software #9, 6/23/94**

Started by Steven Nygard, continued by Ashley Barnard Armstrong.

Ashley - ashley@amug.org - 505 West Granada, Phoenix, AZ 85003. 602-553-8966 daytime phone.

- This list is compiled for informational purposes only.
- It can be distributed freely as long as it is not sold without my permission.
- It may be included on InfoMac's CD-Rom, and AMUG's BBS in a Box, all others must get my written permission.
- Please give Steve and I credit for the time we spent compiling this beast!

Most of the titles listed here can be found at [ftp.amug.org /pub/newton](ftp://ftp.amug.org/pub/newton) or [newton.uiowa.edu /pub/newton/software](http://newton.uiowa.edu/pub/newton/software)

For the Newton Mosaic site connect to-> [http://www.uth.tmc.edu/newton\\_info/](http://www.uth.tmc.edu/newton_info/)

This database is also available in FileMaker 2.0 format.

**Comment:** May contain extra notes about the product.

**Date:** This is the date from the last revision date of the program.

**Size:** The amount of RAM the app uses when loaded in the Newt. Remember, the Newton compression is variable.

**Price:** Commercial prices are not suggested retail, but are street (catalog) prices (MacWarehouse, I shareware prices need to be paid, if you use a product, otherwise we will end up paying high prices).

I will try to update this database as often as I can. Feel free to e-mail me with new product and update notices.

Title	Version	Author	Description	Size	Type	Date
24		Erica Sadun	This game consists of a very large number of numbers	37k	Game	10/31/89
