

## Disabling AutoMenus Pro

You can disable AutoMenus Pro at any time on the fly simple by holding down the special modifier key (set via the Settings dialog) while clicking in the menu bar. If you are using the Automatic Selection option, you must have the modifier key held down before you position the mouse in the menu bar. A pop-up menu will appear allowing you to deactivate or activate AutoMenus Pro. You can also turn off AutoMenus Pro at any time by selecting the "Off" radio control in the Control Panel.
