

Auto-Send files

This script will instruct Eudora to send any number of files to the recipient whose e-mail address is the name of the script.

Duplicate this script and rename the copies to suit your needs!

You can also name this script to an Eudora nickname, if you wish. This is especially useful for distribution lists.

A freeware script by: Philippe Casgrain (Casgrain@ecol.ucl.ac.be, Casgrain@ere.umontreal.ca)
