

The 'CP Origin Lines' file is a collection of Origin Lines. These are a collection. CP, Mike Lininger, and Lininger Technology is in no way responsible for their content, implied or otherwise.

If you want COUNTERPoint 2.1 to pull Origin lines from this file on a random basis place it in your CP Stuff Folder...

This is a text file and can be added to. See Add Origin Line Menu Option under the Read Menu to automatically add selected text to the CP Origin Lines file.

Rules

1. CP looks for a Custom Origin line (from the area information)
IF an origin line is found
CP will be used
ELSE
2. CP will look for a file called 'CP Origin Lines'

IF this file is found

CP will pick one of its origin lines at random

ELSE

3. CP will look for a file called 'CP (R) Origin Lines'
IF this file is found
CP will pick one of its, up to 50, Random Origin lines
ELSE
4. CP will use the default Origin line in your setup
END IF
END IF
END IF

Origin Lines must be 50 characters or less in length.

CP will only use the first 300k worth of origin lines contained within the 'CP Origin Lines' file.
