

Reader Format Driver

SoundEdit™

Version 1.0

SoundEdit™

Copyright © 1989 Farallon Computing, Inc.
Berkeley, California (415) 849-2331

This format driver opens and plays uncompressed sound files created with SoundEdit™.

Notes On Use...

- This format driver requires at least System Software version 6.0.2 to run.
- Each SoundEdit document uses an amount of memory approximately equal to its file size.
- Sound files created with SoundCap and SoundWave can also be played since they create the same type of document as SoundEdit.
- The Play Rate menu let's you set the rate at which the sound will be played. If the menu items are dimmed, then the sound file specified the rate at which the sound should be played. Otherwise, you will need to set the rate yourself.
- For files that specify the play rate, the checked item is the rate the sound file specified.
