

# Reader Format Driver

---

## ‘snd’ Resource

Version 1.0

Standard Macintosh™ ‘snd’ Resource, Format 1 & 2

---

This format driver plays the ‘snd’ resources (Formats 1 and 2) that can be found in different types of files. You can also copy the ‘snd’ resources to the Clipboard.

### Notes On Use...

- This format driver requires at least System Software version 6.0.2 to run.
- ‘snd’s take up a lot of memory. Reader may give an error message saying that it ran out of memory while trying to read a file. A solution is to allocate more memory for Reader if you are running MultiFinder.
- If the file contains only ‘snd’s, then the amount of memory the format driver will use to open the file is approximately equal to the size of the file.
- At most, 50 ‘snd’s can be read from a selected file.
