

HyperProject™/MacProject™

Product Comparison

September 1993, page 1

HyperProject™ 1.4 MacProject™ Pro 1.0v1

General Requirements:

Memory Required	1 MB	4 MB
Hard Disk Required	800 K	6 MB

PERT:

Full editing at all levels of zoom	√	√
Multi-project editing	√	√
Align any symbols	√	
Select symbols based on criteria	√	
Bounding rectangle to select groups of symbols	√	
Grid snap	√	√
Set grid snap spacing	√	
Print network zoomed out	√	
PICT export of all window views	√	
Next/Previous buttons for all symbol dialogs		
to edit multiple symbols at once	√	
Data entry and editing shortcuts provided	√	

Activities:

Individually customizable activities	√	
Select multiple activities to edit at one time	√	
Connect multiple activities at one time	√	
Create N-activities in sequence	√	
Duplicate with data automatically copied	√	
Duplicated activity automatically connected	√	
Resizable activities	automatic	user-controlled
Placement of data in activity symbols	inside	outside
Multiple ways to specify activity status		
(started, completed, percent complete, earned value)	√	
Double-click style	inside activity	along border

Activity Constraints (Connectors):

Connector symbol shows constraint type	√	√
Connector style provided	orthogonal lines	diagonal lines
Connector position drag	√	
Connector position lock	√	
Connectors have arrowheads to show flow	√	
Connector types	FS,FF,SS,SF	FS,FF,SS
Any order of activity connection		
(right-to-left connection allowed)	√	left-to-right only
Activities can be moved without deleting and re-connecting connectors	always	sometimes
Can define connector type while using click-and-drag to connect activities	√	
Connector annotation	√	
Edit connector bounding activities in Spreadsheet	√	

Scheduling:

Multiple networks in PERT scheduling approach	together	separately
Subprojects		√
Resource leveling		√
Earned Value	√	

Standard Holidays	√	
Standard Workweek	√	
Standard Vacation days	√	
Milestones have zero duration	yes	no

HyperProject™/MacProject™

User Interface Comparison

September 1993, page 2

HyperProject™ 1.4

MacProject™ Pro 1.0v1

Spreadsheets:

Spreadsheets provided	√	6 predefined types
Customizable Spreadsheet templates	√	
Customizable Spreadsheets	√	
Multiple copies of Gantt & Spreadsheet views	√	only 1 of each type
Integrated window views	√	√
Control over PERT from Spreadsheets	√	
Change spreadsheet style--fonts, colors, date formats	√	
Create activities in Spreadsheet	√	
Filtering--only selected PERT activities shown	√	
Data entry and editing shortcuts provided	√	

Gantt Charts:

Change symbology	√	√
Change style--fonts, colors, date formats	√	limited
Create activities in Gantt	√	
Edit all activity data in Gantt	√	
Create activities in Gantt	√	
Filtering--only selected PERT activities shown	√	

Notes:

PERT notes provided	√	√
Number of notes per activity unlimited	1	
Drag-and-drop notes action	√	
Calendar notes	√	
Activity notes	√	√
Notes in Gantt, Spreadsheet, and Histogram views	√	
Double-click for more info	√	

Histograms:

Histograms	10 types	1 type (resource only)
Export Histogram data	√	
Filtering--only selected PERT activities graphed	√	

Text Blocks (free-form text):

Text Blocks provided	√	√
Change justification	√	
Resize the text drawing boundary	√	√
Double-click for more info	√	
Change style--fonts, colors	√	√

Annotation:

Annotation overlays	√	has PICT's only
Annotation overlays in all window views	√	
Date formats	12	1
Annotation saved in separate files from PERT	√	

Other:

Spelling checker		√
Outline view		√
Tool palette	√
