

## Installing QwikBILL™

To use this software, double-click on file cabinet icon entitled QwikBILL.sea. You will be asked to locate the hard drive for installation. Select a drive other than the floppy disk on which you received the program and click on the Extract button.

The correct folders will be created and the contents expanded.

When the process is completed you will see the set-up shown below.

The items are placed in specific folder locations so that QwikBILL™ can find the files and resources it needs.

Please do not remove any of these items; all are essential for full operation.

When you run QwikBILL™ for the first time you will be asked to register your copy with the serial number that is printed on your original disk. Also, please complete the enclosed registration card to ensure receiving notices of enhanced future versions. Store your original disk in a secure place.
