Chiron, Version 2.2, the Problem Reference Manual for the Macintosh

Released on March 1, 1994

Hi! Welcome to the worlds best Macintosh problem reference manual, Chiron. This basically tells you the:

- Macintosh System Error Codes
- Newton Error Codes
- Sad Mac Error Codes
- Virus Listing
- Trojan Listing

What more could you ask for? For more information, go to the specific chapter of your interest.

To find a specific I.D. code, virus, or Sad Mac code quickly, use the Find command under the File menu.

To see how Chapters are broken up, and to jump to specific sections, hit Command-K (or Apple-K, same thing).

Good Luck!
