## Pheonix, Mac Repair

Pheonix, Mac Repair is a DocMaker document that covers many aspects of Macintosh repairs. The program is interactive with "Easy fix" branching buttons assistance to locate your computer problem. Most existing and discontinued Mac computers are included. The repairs and tips are generally the most common and usually suffice for many problems. Mac Repairs is 28 chapters and 70+ pages in length when printed. Software and hardware fixes and many other tips are included. Even if nothing is wrong with your Mac, it makes great reading. Approximately 1000 downloads of the the last version in the first few weeks on AOL. It was also picked up for distribution on CD and disk. It has also be favorably reviewed in three publications. Well worth the download, do it and print yourself out a Mac repair manual or interact directly with the program.
