

Graphplot II On-line Help System

To use this help system, simply click on a topic from the list on the left. This panel will display help on that topic.

The topic buttons below allow you to browse help pages in sequence.

Within help, an item in bold, like this, refers to an item with a separate help entry. Clicking on the item will take you immediately to the help page for that item. An item in **Chicago** font refers to a menu or menu item in the application. An item that is underlined, like this, is an important item that is dealt with on the page currently displayed. Sometimes, *italic* is used to indicate a technical term which relates to the topic being discussed.
