How to Import a Definition

1. Open Apple Modem Tool from an application that can make use of it (such as Communicate, PageNOW!, a "works" package, etc)

2. Select "Modify This Menu" from the "Modem:" popup menu:

. Click "Import"

. Select the file you wish to import

. Click "Done"

. Select your modem from the modem selection popup menu

. May any final adjustments, such as selecting the proper serial port, turning error correction on or off, etc.
