INTRODUCTION

Easy KEYS is a control panel device which lets you assign function keys or key combinations to launch applications, desk accessories, or control panels or FKEYS.

INSTALLING Easy KEYS

Just drop the Easy KEYS file in your system folder (or control panels folder under system 7).   Put the Easy KEYS Prefs file in the system folder (under system 6 or 7). You can immediately use the control panel device to define keys, but you must reboot once after installing Easy KEYS before any key combinations will be recognized. (From then on, you can assign and deassign key combinations without ever having to reboot.)

USING Easy KEYS

The Easy KEYS control panel shows a list of key combinations with the name of the application, desk accessory, control panel or FKEY that they launch.   When you first open Easy KEYS, the list will be empty.   Use the New button to make new key assignments.   After clicking the New button a list of choices will appear. Double click on the type of assignment you wish to make: FKEY, Application, Desk Accessory, or Control Panel.   Keys from the keypad and function keys can be used alone or in combination with modifier keys (shift, control, option, and command).   Normal typing keys (such as letters, numbers, return, and delete) must be used in combination with at least one modifier key other than shift.

Key combinations are indicated with symbols for the modifier keys as follows:

Shift: Δ
Control: ©
Option: âŒ¥
Command: âŒ˜
Numeric keypad: #
Function key (on extended keyboard): F

Ex: command-option-function-key 7 looks like
this: âŒ˜âŒ¥ F - 7

Note: While you have the Easy KEYS control panel open, the keyboard assignments you have made will be disabled.   You must first close the control panel to verify or use them.

REGISTERING Easy KEYS

Easy KEYS is shareware and costs $20.00.   Send a US check or money order to the address below.   Please indicate the product and version number you are registering, and specify your name and return address.   Once you have registered, select the "I have paid" button in the help screen to disable the "Not Registered" message on Easy KEYS' startup icon.
