

Great effort has gone into making Versionary as solid and error-free as possible. However, you should not assume that Versionary will suit your needs or work without errors. Versionary is provided "as is" without any warranty of any kind, either express or implied, including without limitation any warranty with respect to its merchantability or its fitness for any particular purpose. The entire risk as to the quality and performance of the Versionary software is with you. Should the Versionary software prove defective, you (and not Santorini or the product's authors) assume the entire cost of all necessary servicing, repair or correction. Santorini does not warrant that the functions in the Versionary software will meet your requirements or that the operation of the Versionary software will be uninterrupted or error free, or that defects in the Versionary software will be corrected. In no event will Santorini be liable (i) to you for any incidental, consequential, or indirect damages (including damages for loss of business profits, business interruption, loss of business information, and the like) arising out of the use of or inability to use the Versionary software, even if Santorini has been advised of the possibility of such damages, or (ii) for any claim by any other party.
