This demo/shareware edition of Versionary is restricted.   It is restricted in three fashions.

1)
It only works with the following applications:

Microsoft Word

Microsoft PowerPoint

Microsoft Excel

Symantec THINK C

Aldus Freehand

Aldus PageMaker

Adobe Photoshop

Clarisworks

SuperPaint

2)
Versionary will only work for 2 hours after your machine is restarted.   After that time, it will disable itself and you will have to restart your machine to enable it for another 2 hours of operation.   Versionary will inform you when it disables itself in this way.

3)
Versionary will only load for 20 consecutive restarts of your machine.   After that time, it will no longer load and will not work.   Versionary will inform you when it has exceeded its restarts limit.

A lot of hard work went into developing Versionary.   If you use the product and like it, you'll probably want an unrestricted edition.   To obtain such an edition, you will need to register your copy with the product's authors.   To register your copy of Versionary, please mail your name, address, the version number, and $30 to:

Santorini Consulting & Design, Inc.
2147 Union Street, Upper Level
San Francisco, CA   94123
415-563-6398

Once you register, you will be mailed a registration card and a new time-unrestricted edition of Versionary. That means you will be able to run your edition of Versionary without any expirations or timeouts (see below).

If you wish to have Versionary work with other applications, not supported in the demo/shareware edition (see below), you may call Santorini for a customized edition which will then be mailed to you for $100.
