

I would like to thank a couple of people for making this project possible :

My Mum and Dad	without them noone would ever have heard of me
Ernst Prensberger	for tons of good ideas and bug reports on beta versions
Franz Almberger (Alf Graz)	for beta testing and maintaining a great mailbox (AMDA Link Graz)
Douglas Adams	kept up my humor even after dozens of system crashes
Terry Pratchett	also did very good things to my humor
Apple Computer	for making the best personal computer in the world and a great development system (MPW)
Some unknown guys&gals	for creating great startup screens and giving me this idea
