

MULTIMEDIA backgrounds

The multimedia backgrounds that you are about to view were designed by Gregg Raaum, President of Romancrow Graphics. Gregg is a 19 year old college student who started working with Macintosh computers at the early age of 9 years when the first 128k version was introduced. Although he was an art student for most of his life, he didn't begin to use his talent to create works of art on the computer until August of 1993. If you would like more information about Gregg, the work he has designed, or if you have a job you'd like him to pursue, please see the address and phone number below.
