

## About Boxes

If you do modify your Notebook application with ResEdit, you'll note that you could also modify the DLOG resource that is used to display the 'About Notebook...' window.

We would ask that when you distribute your Notebook applications, that you do not change that resource and dialog box (though you can change the text of the 'About...' menu item if you wish).

If you wish to have some form of customised 'About' information for your notebook, we suggest that you insert the appropriate graphic into the first topic of your Notebook, as has been done with this Notebook Maker documentation window.
