

System Requirements

All Meadows Quark XTensions will operate under Macintosh System software version 7.1 and QuarkXPress v3.3 or later.

Installation

To install the Meadows XTensions, simply drag the XTensions into the same folder where your QuarkXPress application is loaded. Then, launch QuarkXPress. The XTensions will load automatically.

QuarkXPress v3.3 Users: You may optionally drag the XTensions into the XTension folder which is located in the same folder where your QuarkXPress application is loaded. This feature is available with QuarkXPress v3.3 only.

To install the XTensions on more than one Macintosh, repeat the steps outlined above for each workstation.
