Copyright © 1992 Vision's Edge, Inc.

DocStamp™ is freeware but Vision's Edge, Inc. retains all rights to the code and resources of the program. This document must be distributed unaltered with DocStamp™. I don't believe in shareware, so do NOT send me money even if you find this XTension useful. If you feel you must compensate me in any way then purchase one of my other useful XTensions for QuarkXPress. These XTensions are listed below and are available through XChange 1-800-788-7557 or 1-303-229-0620.

DocStamp™ allows you to place the document name in a box and every time the document is saved, the name of the document is placed in the DocStamp™ boxes.

Attaching a Document Stamp

To attach a DocStamp™, create a new text box and select "Add Document Stamp" from the Utilities menu. The name of the document is inserted into the box. If the box already contains text, an alert is posted to warning you that the text will be erased when the document stamp is added. You can abort the document stamp by pressing Cancel in the alert dialog.

Removing a Document Stamp

To remove a document stamp, select the box that contains the document stamp and select "Remove Document Stamp" from the Utilities menu. If the box does not contain a document stamp, the "Remove Document Stamp" does not appear. Instead, "Add Document Stamp" appears in the menu. You can also remove a document stamp by deleting the box that contains the stamp.
