Demo Copy Limitations

All Meadows Demo XTensions are compatible with QuarkXPress v3.3 or later ONLY.

The Grabber Demo XTensions will turn QuarkXPress into a demonstration version when they load. To restore Quark to a fully working version, simply remove all Grabber Demo XTensions from the folder.

WARNING - NOTICE - READ THIS! Documents saved with a demonstration version of QuarkXPress CANNOT BE OPENED by the fully functioning version of QuarkXPress. Therefore, to ensure that documents are not accidentally saved while testing our XTensions, the Quark Save option has been disabled. You can still use Save As.. if you wish. To restore Quark to a fully functioning version you must remove all demo XTensions from the folder.

Should you wish to Save a document, please use Save As... instead.
