

## Text Case Conversion

ctivated by selecting "Text Conversion" from the Options menu. Make any format option changes by selecting the appropriate button. If the input format is a custom filter, then the only fields affected by this selection are those fields that have their attributes set for text conversion (see the Custom Filter chapter). Otherwise, without a filter as the input format, all fields will be affected by this selection.

Note that the text of each option is also an example of how the action affects the text.
