

The Rockefeller Files

News from SMUG's BBS

New files appear on MacExpress with some regularity. Usually something fresh can be found every week in the Recent Stuff folder; check there often. After a few weeks, these files aren't so new anymore and are moved into the various sub-folders in the SMUG Files folder. Listed below are just some of the recently added files. If they are not in the Recent Stuff folder, look in the folder listed after the item's description.

BBEdit Lite is a great, small text editor. It is the little brother to BBEdit, now a commercial application. Version 2.3.1. Shareware. [SMUG Files:Business]

If you use FirstClass bulletin boards, you will want the **BulkRate updater**. It updates the FirstClass mail reading utility BulkRate to version 1.7.1. [SMUG Files:Updaters]

Open-wide is a control panel device to display long file names in open and save dialog boxes that would not ordinarily fit. Version 3.5.4. Postcardware. [SMUG Files:Business]

Gatekeeper, a well known virus prevention program, runs all the time and monitors your system for suspicious activity. Version 1.2.8. Freeware. [Public Utilities:Virus Protection]

If you need Japanese fonts, you need **Hiragana** and **Katakana**. These fonts are available in PostScript Type 1 and TrueType formats for your printing pleasure. [SMUG Files:Desktop Publishing: PostScript Fonts or :TrueType Fonts]

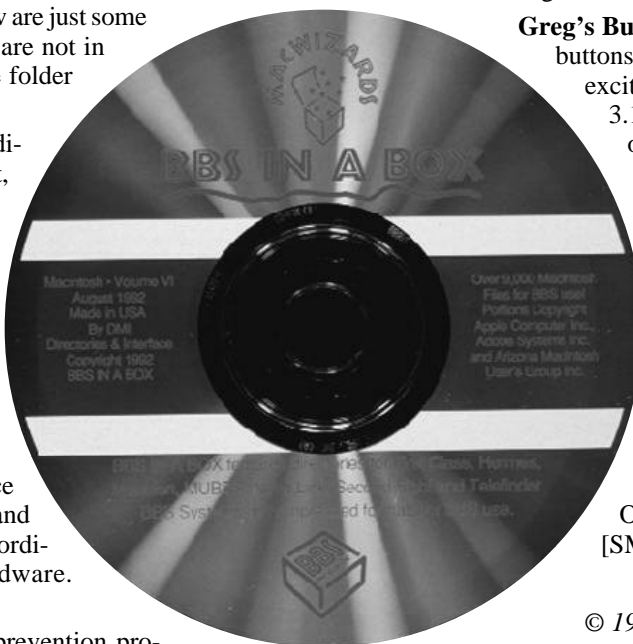

Greg's Buttons makes 3d radio buttons, push buttons and check boxes for your interface excitement. SYSTEM 7 ONLY. Version 3.1.1. Shareware. [SMUG Files:Disk of the Month: January '93]

ZipIt is a utility to convert to and from the ZIP file compression format often used by IBM compatibles. [Public Utilities: Compression Utilities]

Here's a utility to convert text files from other systems, the ones with the funny unprintable characters, to Macintosh format. **Drop Text** isn't fancy, but if you need it, you really need it. SYSTEM 7 ONLY! Version 1.1. Freeware. [SMUG Files:Utilities]

New SMUG Members

A Hearty Welcome!

We had a very good monthly meeting in September. Seven individuals became dues paying members; we also had four renewals. Joining us for the first time are: Janet Swindell, Jim & Lisa Morekis, Gerald Schwartz, Jerry Harris, Vicky Lambeth, and Longwater Advertising.

Janet Swindell from Pt. Wentworth has a Personal LaserWriter NT and uses an LC III "for everything." (H 964-6490)

Gerald Schwartz uses a 660AV and makes stained glass windows for a living. (H 233-9795)

Jerry Harris, formerly of New York and Philadelphia, uses a Mac at work and home. One has to kind of wonder how he uses it at work — since he's a Tai Chi Instructor. Tai Chi Mac? (H 233-0752)

Jim & Lisa Morekis have a Centris 650 and a Stylewriter II and use it for graphics and word processing. One has a degree in Journalism and one is an Audiovisual Technician at IVS Media. (H 351-9520)

Vicky Lambeth is not only a new member, she is also our new Program Coordinator. Vickie was kind enough to bring a videotape introduction and an actual Newton! (hey, let me see that..) to the September meeting. (H 897-0708)

Longwater Advertising (on Tattnell Street) also joined SMUG. Designers at Longwater use FreeHand, PhotoShop, and QuarkXPress on projects for national accounts.
