

IsleSoft

2497 West River Road
Grand Island, N.Y. 14072

Mac Mailing is distributed in it's full version as "Shareware" and the price has been reduced to \$20. For a period of time the program was priced at \$30.00 and only available via mail order.

Please respect our rights. If you use Mac Mailing, please send us the \$20.00. It is very discouraging to try to provide low cost software via shareware only to have some people take advantage of this situation. We really do give 50% of all revenues received to charity. We appreciate your honesty in this matter.

We hope you enjoy **Mac Mailing!**

The first thing you should do is print the Mac Mailing documentation.

The documentation is contained in two files. Use Mac Write or any other word processing program that will process Mac Write files to print out the documentation.

Good Luck and Happy Computing!

A handwritten signature in a cursive script that reads "Tony Buscaglia".

Tony Buscaglia - **IsleSoft**

P.S. Version 2.2 of Mac Mailing is compiled with version 4.01 of ZBasic and should be compatible with Multifinder and MacII's. Please let us know of any compatibility problems.
