TEScroll Bug
Text

Revised by: March 1988
Written by: Bryan Stearns   April 1986

A bug in TextEdit causes the following problem: a call to `TEScroll` with no horizontal or vertical displacement (that is, both `dh` and `dv` set to zero) results in disappearance of the insertion point. Since such calls do nothing, they should be avoided:

```
IF (dh <> 0) OR (dv <> 0) THEN TEScroll(dh,dv,myTEHandle);
```
