Snapshot
of
Experience

- **Computer Programming:**

    since 1985:
    developing software, teaching
    computer classes, using
    DeskTop Publishing software
    and configuring computer
    systems for businesses ... all
    focused on the Macintosh.

    1981–>1985:
    developing software
    for Apple][s.

    pre–1981:
    scientific programming on
    main frames.

- **Systems Program
    Management:**

    13 years including basic
    research, exploratory &
    advanced development,
    Engineering development and
    Full Scale development of major
    weapon systems.

- **Financial Management:**

    six years including
    Design-to-Cost,
    Life-Cycle-Cost and Schedule
    Variation/Optimization
    analyses.

- **Configuration Management:**

    three years assessing
    trade-offs between
    engineering, schedule and
    cost constraints.

- **Physics/Optics:**

    nine years with focus on
    High Energy Laser research,
    both U.S. and Soviet
    technology.

- **Operations Research:**

    three years quantifying
    trade-offs between costs
    and end-game results,
    using alternate strategic
    and tactical strategies.
