Version 1.1
•Distribution now allow background processes to take place.   It will no longer hold up your BBS while it's doing it's thing.
•Added beach ball cursor feedback.   Cursor now changes to a beach ball when ever Distribution or a Distribution Applet is working.
•Better error handling.

Version 1.0.1
•Print code enabled
•Many typos corrected in documentation.

Version 1.0
•Initial release
