

Helpful Hints

Use the Shift Key to Select

In general, you make a selection by holding down the shift key and moving through the parts of the movie you want to select.

Getting Rid of the Selection

To get rid of the selection so that no part of the movie is selected, click in the play bar away from the thumb.

Playing the Selection

You may preview the movie's current selection by choosing "Play In Selection" in the Movie menu. When you start the movie, only the selection will be played.
