• What is Visions ?

Visions is an application that opens graphic and animation files, displays them in a window or in full-screen slide show mode, and puts a miniature of the image in the icon Finder of the document.

Visions can automatically perform these operations on group of files from the Finder, by dragging file, folder or disk icons on **Visions** application icon.

Visions is able to read the following formats:

- MacPaint (black & white)
- StartUp Screen (black & white, or color)
- PICT
- PICS
- GIF (87a and animated 89a variants)
- JFIF (JPEG File Interchange Format)
- Movie (needs QuickTime)

• Compatibility

Visions works on any Macintosh with 68020 or better, and requires System 7.0. A color monitor is recommended.

Visions is 32-bit clean, virtual memory compatible, and has balloon help.

The **QuickTime** extension is required to read Movies files, and compressed PICT files.

• Legal Stuff

The **Graphics Interchange Format**© is the Copyright property of **CompuServe Incorporated**. **GIF**(sm) is a service mark property of **CompuServe Incorporated**.

This software is based in part on the work of the **Independent JPEG Group**.

• How to contact me...

If you have problems using **AutoClock**, if you discover bugs, or if you simply want to tell me you like/dislike this software, you can write me at the following address:

Jean-Pierre GACHEN
11, rue du Port-Vieux
64200 Biarritz
FRANCE
Fax: +33-59-24-63-26

or by electronic mail at:

CalvaCom: **JPG11** or **jpg11@calvacom.fr**
CompuServe: **76667,3075** or **76667.3075@compuserve.com**

If you want a quick answer, please use my CalvaCom e-mail address (I check it daily) rather than my CompuServe address (I check it weekly).
