

**The powerful
all-in-one
education
workstation**

Macintosh LC575

The Macintosh LC575 combines the power of a high-performance processor and the convenience of an all-in-one design to create the ideal education workstation for students and teachers.

The Macintosh LC575 CDC Color System
(includes the Macintosh LC575/160 computer with CD-ROM and Apple Keyboard II)

**Power, Convenience,
Versatility—All in One**

The Macintosh LC575 is Apple Computer's most powerful all-in-one education workstation. Featuring a 33-megahertz LC68040 processor, this computer is the ideal choice for classrooms, labs, and teacher desktops. It can handle a wide range of tasks—from math problems and science projects to record keeping, multimedia presentations, and word processing—at speeds up to three times faster than the Macintosh LC520.

And with its all-in-one design, the Macintosh LC575 computer comes with everything you need to take advantage of today's multimedia applications—right out

of the box. Everything is built in: a brilliant, high-resolution 14-inch color Sony Trinitron display, stereo speakers, a microphone, and an internal tray-loading CD-ROM drive.

These integrated multimedia features let students and teachers take advantage of the growing number of CD-based education software applications and multimedia technologies that enhance teaching and learning. They make it easy for students and teachers to learn and express themselves in more creative and effective ways than ever before.

Because the computer's components are neatly contained within a single case, schools have fewer external parts to track

and secure. And teachers can set up the system simply by plugging in one cord.

Grows with You

The Macintosh LC575 is expandable with additional cards. It has two expansion slots, giving you extra flexibility. For example, you can take advantage of low-cost, high-speed networking cards, add video capture/display capabilities, or both. And it is upgradeable to the new PowerPC processor, so you'll be able to take advantage of powerful new technologies as they become available.

Macintosh Advantages

Macintosh computers allow you to accomplish more, with less time and effort, than other computers.

Best Value

Macintosh computers consistently cost less than PCs over the long term because they require less training, maintenance, and support. And Macintosh computers come ready to do everything you want to do: from multimedia curriculum applications to file sharing in labs to personal productivity applications.

More Top-Rated Software

Like all Macintosh computers, the Macintosh LC575 runs thousands of Macintosh applications—in virtually every application area, including curriculum, teacher productivity, and administration. And 29 percent of top-rated education software programs run only on Macintosh, compared with 13 percent that run only on DOS.*

Easy to Use

Because the Macintosh LC575 is a complete system, you can take it out of the box and have it up and running in no time. You won't have to spend much time learning or teaching new applications because all Macintosh applications follow the same intuitive, consistent interface. That means you'll spend more time teaching and learning—less time figuring out how to use the computer.

Grows with You

The Macintosh LC575 is a powerful, versatile computer, yet it's ready to grow as your needs evolve. There are thousands of Apple and third-party products that can add capabilities to your Macintosh quickly and easily. With Macintosh, you have freedom of choice while protecting your investment in hardware, software, and training.

Key Features: Macintosh LC 575

Convenience

- All-in-one design for easy setup and use
- One plug computer
- Front panel contrast and volume controls
- Front panel headphone jack
- Power on/off from keyboard
- Energy-saving feature reduces power consumption by more than 50%

Built-in Media Capabilities

- High-quality color display
- Double-speed, tray-loading CD-ROM drive
- Stereo speakers
- Microphone

Power and Speed

- 33-MHz LC68040 processor

Memory and Storage

- 5 MB of RAM, expandable to 36 MB
- 1 MB VRAM
- Internal 160 MB hard disk
- Internal double-speed, tray-loading CD-ROM

High-Quality Color

- Integrated 14-inch Sony Trinitron RGB display
- 640x480 pixels
- Supports 16-bit color (32,768 colors)
- Meets ELFA/LF requirements

Expansion

- Macintosh LC-compatible Processor Direct Slot
- Built-in ports for peripherals
- I/O communications slot for low-cost Ethernet networking†

Features Built Into Every Macintosh

Usability

- Runs thousands of Macintosh applications
- Easy to set up, learn, use, and expand

System Software

- System 7.1 with multitasking, file sharing, QuickTime, Balloon Help, TrueType, and more

Networking

- Built-in AppleTalk networking
- File sharing without a dedicated server

Compatibility

- Reads and writes Macintosh, MS-DOS, OS/2, and ProDOS floppy disks

Recommended Complete System

Macintosh LC575 CD Color System*
Order Number: B1892LL/A
Education Price: \$1,699**

* Includes Macintosh LC575 5/160 computer (with 14-inch Sony Trinitron color display, AppleCD 300i Plus CD-ROM drive, stereo speakers and microphone), and Apple Keyboard II.

** Does not include setup. Price quoted is available to K-12 education institutions only.
† Available from Apple for \$84.
