

AppleShareFileandPrintServices

AppleShare file and print services set the standard for networking flexibility and ease of use. Now that same ease of use has been expanded into a complete family of performance offerings. Whether you are networking a small business or a classroom, a global enterprise or a laboratory, AppleShare can meet your needs precisely. All AppleShare versions provide full-featured effective security, shared file storage for an entire workgroup, and queued access to up to five network printers. All support the multitasking features of System 7, so other services and application programs can run at the same time. And, all versions provide simple cross-platform support, giving DOS or Windows users transparent access to AppleShare's file and print services.

In all its versions, AppleShare is the heart of workgroup and departmental computing. Building on the intuitive

simplicity of Macintosh file sharing, AppleShare adds centralized storage and administration, higher performance, and greatly increased security. By giving users of Macintosh, Apple II, and DOS Windows computers access to the same documents, the AppleShare File Server simplifies and speeds up collaboration between group members. And, by allowing users to continue working while their documents print on networked LaserWriter or ImageWriter printers, the AppleShare Print Server improves productivity. Whether your work involves creating budgets, searching databases, producing publications, or assembling reports, AppleShare helps members of your organization work better together.

The AppleShare Family

AppleShare 3.0

Economical file and print service for small AppleTalk workgroups. Supports up to 15 active network users, with up to 120 concurrent logons.

AppleShare 4.0

High-performance file and print service for classroom and small-to-medium-size business environments. Supports up to 30 active network users, with up to 150 concurrent logons.

AppleShare Pro

Highest-performance file and print service for larger, more demanding workgroup environments. Supports up to 50 active network users, with up to 200 concurrent logons.

AppleShare Advantages

- > Easy to set up, administer, and use
- > Performance scalable to any size Macintosh workgroup
- > Powerful, flexible security

AppleShare File and Print Services

Product Details

Which version of AppleShare is right for you?

The answer depends on the size of your workgroup and your performance needs.

AppleShare 3.0 is the perfect solution for smaller workgroups, whether in business or education, that have outgrown the basic file-sharing capabilities of System 7. You can have it up and running within fifteen minutes on any System 7 Macintosh. Its centralized administration and easy access to shared files make workgroup collaboration a breeze, yet it has the full-featured security needed to keep your most important data safe.

AppleShare 4.0 is specially designed to take advantage of the on-chip instruction caching of the new 68040-based Macintosh platforms. On comparable 040 machines, you can expect performance two to three times faster than with version 3.0, making AppleShare 4.0 the fastest Macintosh-based file and print server on the market. This is the ideal choice for medium-sized workgroups with heavier performance demands. As easy to set up and administer as AppleShare 3.0, AppleShare 4.0 is a perfect match for the new Apple Workgroup Servers 60 and 80. These two new platforms offer all the Macintosh advantages, but they are specifically designed as network servers with features like large hard disks for ample network storage and DAT drives for backup.

AppleShare Pro utilizes the specialized hardware and operating environment of the new Apple Workgroup Server 95. AppleShare Pro boosts server performance to four times that of AppleShare 3.0 running on a Quadra 950. Larger workgroups that need the highest-performance file and print service will want to take full advantage of the speed of AppleShare Pro. AppleShare Pro is designed to do one thing—really fly. And because it has the traditional AppleShare ease of setup and administration, you already know how to use it. In addition, AppleShare Pro supports up to 5000 open files and 28 hard disks connected to the server. Now there is an AppleShare product for even the most demanding of server environments.

Multiple Services

- > Supports System 7 multitasking including program linking and publish and subscribe
- > Includes file and print servers
- > Open environment allows additional network services

Sharing Options

- > On-line CD-ROM exchange
- > Either folders or entire disks can be shared
- > Client software built into every Macintosh
- > Easy server selection through the Chooser
- > Intuitive, consistent access to shared resources
- > User-controlled access to information

Print Spooling

- > Spooling for up to 5 AppleTalk printers
- > Centralized queue management
- > Simultaneous print requests accepted
- > Reduced user delay
- > Print log for up to 1000 print jobs

Administrator Control

- > Administrator-determined number of connected users
- > Server messages can be broadcast or sent to selected users
- > Administrator-determined cache sizes to maximize performance

Security

- > Minimum password length
- > Password aging
- > Password history to prevent immediate reuse
- > Ability to disallow saved passwords
- > Account disable after specified number of password failures
- > Adjustable time limit for temporary accounts
- > Guest access turned off by default
- > Copy-protection setting for documents
- > "Lock" setting for folders
- > Adjustable number of concurrent application launches*
- > Inherited folder privileges
- > Administrator log-off of any user

* Requires a multi-launch application and appropriate license agreement.

Specifications

	3.0	4.0	Pro
Concurrent logons	120	150	200
Open files	346	346	5000
Number of hard disks	7	7	28
Users†	8192	8192	8192
Groups†	8192	8192	8192
Users in group†	8191	8191	8191
Groups per user	42	42	42
Locked ranges/user	20	20	20
Apple II logon	yes	yes	no
Apple II network startups	40	n/a	n/a
Minimum RAM	4MB	8MB	16MB
System Software	7.0	7.1	AUX3.0.1

†The sum of users and groups cannot exceed 8192. The recommended limit is 2000.

Supported Platforms

AppleShare 3.0	any Macintosh computer
AppleShare 4.0	Centris 610, Quadra 700, 800, or 950 Apple Workgroup Server 60 or 80
AppleShare Pro	Apple Workgroup Server 95

AppleShare Access Privileges

- > Both the user and the administrator can control access to information
- > 8 different access privileges

How users view shared data:

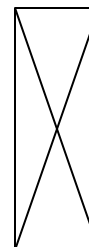

Full access privileges

Drop folder, write capability only

No access privileges

How users protect their data:

Can't see enclosed folders

Can't see enclosed files

Can't write to folder

Can't write to or see folders

Can't write to or see files

Ordering Information

AppleShare Server 3.0
Order No. M0090Z/D

AppleShare 4.0
Order No. M1738Z/A

AppleShare Pro
Order No. M6825Z/A
