

Macintosh Duo Dock and Duo MiniDock

There's no better way to enjoy the best of both worlds in personal computing—the world of desktop computing with large color display, full-size keyboard, and expansion capabilities, and the world of take-it-wherever-you-work notebook computing—than with the Apple Macintosh Duo System.

The heart of the Macintosh Duo System is the PowerBook Duo notebook computer, a 4-pound powerhouse small enough to take almost anywhere. Just slip the Macintosh PowerBook Duo into your briefcase or backpack—all your applications and files are stored securely in the computer's hard drive—and take your work with you.

Back at your desk, slide your Macintosh PowerBook Duo notebook into the Macintosh Duo Dock—it's as easy as inserting a tape into your VCR. The Duo Dock allows you to connect your PowerBook Duo to

a complete desktop system—which can include a large color display, an extended keyboard, a mouse, and other peripherals—and provides expansion card capabilities and connections to your network and network servers.

Apple's new PowerLatch docking technology ensures easy, automatic docking between the Macintosh PowerBook Duo and the Duo Dock, so there's no need to plug and unplug cables or to reconfigure the system each time you insert the PowerBook Duo to the Duo Dock.

And when you're away from your office and want to work with desktop resources, you can use the portable Macintosh Duo MiniDock. It provides standard Macintosh connections to large displays, a modem, and other peripherals. The Macintosh PowerBook Duo Floppy Adapter provides direct access to a Macintosh HDI-20 External 1.4MB Floppy Disk Drive.

Macintosh Duo Dock Features

- > PowerLatch docking technology for easy, automatic, one-step docking
- > Internal 14 MB Apple SuperDrive
- > Built-in video support for 256 colors, expandable to 32,000 colors
- > Supports most Apple displays, including the Macintosh 16" Color Display, as well as some VGA and SVGA displays
- > Two NuBus expansion slots
- > 10 built-in ports, including SCSI port for up to six peripherals, such as an external hard disk or CD-ROM drive
- > Security key for locking PowerBook Duo and slot for a security cable

Macintosh Duo MiniDock Features

- > Small size and weight for easy portability
- > PowerLatch docking technology
- > Built-in video support for 256 colors
- > Supports most Apple displays, including the Macintosh 16" Color Display, as well as some VGA and SVGA displays
- > 9 built-in ports, including SCSI port
- > Slot for a security cable
- > Port for connecting external floppy disk drive
