

# Apple LaserWriter Pro 600 for Windows

## Apple LaserWriter Pro 600 for Windows Features

### Print quality

- 600-dpi resolution for high-quality text in PostScript mode
- PhotoGrade for enhanced images at 300 dpi, FinePrint for smooth text and lines in PostScript mode
- 300-dpi-resolution HP LaserJet IIP (PCL 4+) emulation mode
- 75 fonts for printing in a wide range of sizes and styles

### Compatibility with Windows and DOS

- Simultaneous connection to parallel, RS-232 serial, and LocalTalk ports
- Adobe PostScript Level 2 software and HP LaserJet IIP (PCL 4+) emulation
- Automatic emulation switching between PostScript and HP LaserJet IIP emulation modes; LaserTools Printer Control Panel software included

### Convenience and flexibility

- Two (100- and 250-sheet) paper trays
- Optional envelope feeder (75-envelope capacity)
- Optional 500-sheet feeder
- Maximum capacity with options: 850 sheets

The Apple LaserWriter Pro 600 for Windows provides unsurpassed print quality for Windows computing environments. In fact, no other printer in its class offers image quality so impressive.

With true, 600 dots-per-inch (dpi) resolution, the LaserWriter Pro 600 lets you print text at four times the resolution of conventional laser printers.

Because it uses Apple PhotoGrade and FinePrint technologies, the LaserWriter Pro 600 can give you high-quality images and graphics even at 300 dpi. PhotoGrade technology allows up to 91 levels of gray, the equivalent of 1000 dpi. FinePrint smoothes outlines and curves in text and line art that would otherwise appear jagged.

The LaserWriter Pro 600 for Windows is compatible with Windows and major MS-DOS applications because it uses Adobe PostScript Level 2 software and

HP LaserJet IIP (PCL 4+) emulation. Automatic emulation-switching software allows DOS and Windows users to switch easily between PostScript and LaserJet IIP emulation modes.

The LaserWriter Pro 600 offers plug-and-play installation. Parallel, serial, and LocalTalk ports connect the printer to Windows, DOS, and other computing environments. All ports stay active so you can send documents to any port, without having to change a single setting.

For added flexibility, the LaserWriter Pro 600 comes with two paper trays and an expandable array of options, including a 500-sheet feeder and a 75-envelope feeder. With a total paper-handling capacity of 850 sheets, the LaserWriter Pro 600 packs many features into a compact design and gives you an impressive combination of print quality and power.
