### 1.2 Introduction

WELCOME TO JTE's MAGICWB ICONS 10

After 3 months of doing nothing, I finally loaded up the old paint program, and cutted'n pasted 90% of all these icons in this package in a day. It took about 10 hours of intense remapping, cutting and pasting and more remapping! :)

The rest I did over a two week period, and I'm now drained. It will at least take a couple of months before I recover!! 8)

Some of these icons are stolen from the Mac, as I been using ShapeShifter a lot lately. Fantastic program. I recommend it to everyone with a juicy Amiga (and preferably a graphics-card!).

I hope all you Amiga nuts out there (if there are any of you left?!) like'em. It's just over 30 of'em magic ones in this archive.

---

Enjoy! B)

BTW: I hope VIScorp don't make a fool out of them selves...

## 1.3 Information

All the icons in this package are in 8 colors, 3 bitplanes.

MagicWB v2.0 have a demon that controls the icons so they have the correct colors. So if you use a 16+ color MagicWB, the icon colors will not be messed up. This makes MagicWB v2.0 nearly as fast as the standard 4 color icons.

There are many utilities available now that do the same as the MagicWB demon. Get hold of one if you aren't a registered MagicWB user.

Use IconDepth (v1.4), DoIcon (v1.4), OptIcon (ITool201.LhA) or whatever to convert your icons to 3 bitplanes, for speed.

I have saved the ImageDrawers as projects or tools, so I don't have to make a dummy file to avoid SwazInfo and other programs to go apeshit when you drop the icons in it's field!

## 1.4 Copyright? What? This is stolen property!?

COPYRIGHT

MagicWB is Copyright ©1992-1994 Martin Huttenloher.

JTE's MagicWB Icons 10 is Copyright ©1996 Jan-Tore Eliassen.

This package is FREeware, but feel free to send me a postcard if you like my cutting'n pasting, also feel free to alter these icons, as I have done with "yours"!

You are allowed to spread it all over the world using any storage medium available, but you must spread the whole archive.

Programmers & creators of PD-software are allowed to include single icons of this package in their own package-distributions.

No one is allowed to take more than £1,- (English pound) including disk and copying cost, and you must include some other MagicWB icons/patterns to fill up the disk by at least 90%.

## 1.7 I've made this shit too!

- Iron Maiden cardset for REKO's Klondike Deluxe AGA III and/or Logic Systems Cardgames Deluxe AGA.

Note! There's 2 versions, the original and the improved for Klondike II & III, which contains some more pictures. I don't think it's on AmiNet, but I got it and the REKO folks got it!! (I saw the original on the NFS AGA Experience Vol. 1 CD-ROM! :(

- JTE Magic WB icons 3 -> 9 (JTEMWBx.LhA)
- My Dircetory Opus v4.12 config with lots of buttons, filetypes etc. and a detailed AmigaGuide description file for the config. (JTEDOpus.LhA)

Note! A new and improved version are on the way. I give a shit that DOpus 5.x is out there ruling the masses! I'll stick to version 4 a couple of years more...

- 4 Grayscale MagicWB patterns packs for use with Magic Selector. (JTEPatx.LhA)
- 3 bootup pics for the great AmigaStart. (JTEBPic.LhA)
- 4 custom maps for Worms from Team17 (JTEWorms.LhA). Maybe I release another one...

PLEASE NOTE! JTEMWB1.LhA & JTEMWB2.LhA should be deleted from the face of the earth as they are lame and the icons from those two packages are updated in JTEMWB3.LhA anyway!

## 1.8 How to install the icons

Click on ClickForColors for the MagicWB v2.0 palette.

Use a icon update program, like MUI\_IconUpdate, IconUpdate, SwazInfo or any other, which preserves the tooltypes and position of the icon, to update your old icons.

## 1.9 Greetings Fellow Earthpeople!
